BC Eric Machat

Definition

The young Czech typographer Matyáš Machat decided on his own interpretation of Gill's typeface. He did not undertake it to simply iron out the typeface to his own liking, but by looking into Gill's variants of individual glyphs. He decided to confirm the typeface's calligraphic conception, its expressive unification, inner organic nature and suppress overly irritating features. For the aforementioned letters b, d, p and q, for example, the upper strokes of the letters p and q are again drawn as round, and the same roundness appears at the lower connector of the letter d, which Gill terminates differently than the letter b. For the letters b and q, it is also the calligraphically drawn bowls which in doing so lose their excessive monolinearity. This leads to a unification of shapes. The same type of straightening then occurs with the letter e as well; its crossbar does not contrast as much in Machat and does not draw attention to itself. The most characteristic letter, a, is based on Gill's calmer and more calligraphic version: A picturesque, more bulging bowl and monolinearly terminated upper stroke enables it to be perfectly tuned with the rest of the alphabet, which is extraordinarily important for such a frequently-used letter (along with e).

ABOUT

DISCOVER

Sotheby's became a UK public company in 1977. In 1980, after a drop in sales, Sotheby's relocated its North American headquarters from Madison Avenue to a former cigar factory at 1334 York Avenue, New York. The auction house closed its Madison Avenue galleries at East 76th Street. The Los Angeles galleries were sold and West

The 1980s through the 2000s saw record prices at Sotheby's for 20thcentury masterprices, including Picasso's Garçon à la pipe, which sold in New York for \$104.2 million (2004) and Andy Warhol's Silver Car Crash for \$108.4 million (2013). Meanwhile, in London, Rubens' The Massacre of the Innounts achieved £49.5 million in

BC Eric Machat Headline

Definition

A narrowed weight, originally named Condensed, is one of the variations Eric Gill designed as a headline supplement to the Gill Sans family. But it was not a narrowed weight in today's sense of the term, because Gill chose a surprisingly expressive cursive morphology for these proportions. Given the constructed nature of the drawing of the basic proportions, this contrasting approach is understandable. In the case of the Eric Machat typeface, however, it was not difficult to avoid divisions – thanks to a more organic morphology and the choice of alternative bottom serifs on the lowercase a brought about agreement on the shape requirements of both proportions. This typeface adopts the original's shape shortcuts only at a few moments. The most significant of these is the breaking of the rounded strokes, especially for the letter O, which provides the typeface with a certain touch of art deco. Another adopted special characteristic is the rounded design of the diagonal of the R. It was not necessary to distinguish the condensed italic proportionally, but it uses similar cursive shapes of the characters as with the non-narrowed proportions.

BC Eric Machat Script

Definition

Eric Machat Script represents Matyáš's adaptation of Eric Gill's handwriting into a script font. As the name of the typeface suggests, it adds a script weight to the Eric Machat family. The intention was not to simulate Gill's personal handwriting, but to use the character of its morphology for a more compact script with wider usage. The creation of the font was preceded by an analysis of a number of letters and notes written in Gill's hand. A more austere and less connected version of Gill's handwriting was chosen as the main model. It was necessary to summarise the shape variations of individual characters, including the ways they were connected to other characters. This system has been successfully transferred to a set of contextual alternative characters and a programming language which can correctly activate these alternatives. The typeface contains alternative lowercase letters which change depending on the context of the surrounding letters so as to adequately connect in one of three ways, or to remain unconnected. When the basic block uppercase letters come in contact with the lowercase, they become dynamic (swash) uppercase letters intended for the beginning of words. With regard to numbers, it is possible to choose not only proportional or lining figures, but also old style figures, which are somewhat of a compromise between the first two.
