

Novatica

Definition	<p>Novatica was created based on a commission from the Czech commercial television station Nova in 2007. Marek Pistora worked with Tomáš Brousil to create an alternative to a readable, simply designed sans. They naturally called the typeface Novatica. In 2014 TV Nova decided to abandon Novatica for good, and in so doing it released the exclusive licence it had been using. Novatica thus became a new typeface offered by Briefcase Type Foundry. The typeface bears a slight hint of 1970s typography. It cleverly combines this essence with the almost timeless appearance of today's popular grotesques, but still has a balanced character when compared to the popular Helvetica, for example. Novatica features a clearly readable design and pleasant width proportions. One of its interesting assets are its embedded ink traps, primarily used to connect rounded strokes to stems. They are nearly invisible at normal sizes, but they brighten the skeleton quite nicely. In contrast, at larger sizes the ink traps become an interesting element. The missing projecting stem next to the shoulders in "n" and "m" is a typical feature. Given the character of the typeface, the single-bowl "a" is also pleasantly uncommon. The family has a total of five weights, including strongly slanted italics. Novatica is a typeface with a seemingly simple typeface structure and broad range of possible applications.</p>
Basic info	<p>Number of fonts in a family: 10 (Light, Light Italic, Regular, Italic, Medium, Medium Italic, Semibold, Semibold Italic, Bold, Bold Italic) Number of glyphs per font: 494 Release date: 2017</p>
OpenType Features	<p>Fractions (frac) Localized Forms (locl) Case Sensitive Forms (case) Slashed Zero (zero) Lining Figures (lnum) Tabular Figures (tnum) Superscript (supr) Scientific Inferiors (sinf) Numerators (numr) Denominators (dnom) Stylistic Sets (ss01)</p>
