

# Orion

Definition	<p>Orion is the first of Stanislav Maršo's four grotesques which we have decided to digitise due to its timeless juiciness and attractiveness. Orion is a distinctive and idiosyncratic grotesque which will captivate with its sturdy drawing. It was designed in a single boldness as a wide title cut intended especially for headlines, which corresponds to its very high x-height as well as shortened baseline. Orion was adapted to the low-quality printing industry and the difficult conditions for newspaper setting at the time, when the typeface's depiction was squeezed and deformed by high printing speeds, high roller pressure, thin paper and inks that were too thin. It is precisely the modelling of the typeface according to the difficult technical requirements at the time that makes Orion into a timeless font.</p>
