

RETRODUKTOR

Definition	<p>It was a time when music clubs had become laboratories for multisensory experiences. It was a barrage on the eyes, ears and entire body. Smoke machines changed everything. In the second half of the '70s they were par for the course in every nightclub. Before smoke machines, lights just flashed, synchronised to a given frequency. But smoke brought 3D effects and that brought about a boom of their own for spotlights. Multicoloured rays blazed a trail through the room. In the final phase of development they started moving thanks to motors on the lamps. Beams circled the room like helicopters, as if they were searching for something, scanning floors and walls and writing their own messages in a single stroke. These movements – awkward, not exactly graceful, but still quite precise – are the ones Retroduktor copies in its morphology.</p>
