

Definition

The Trhan typeface was conceived in a similar fashion to the designer's other typographic projects: quickly, on a sudden impulse and on the basis of a simple idea. The letters were torn into pieces of paper with nail scissors and then scanned with minimal post-retouching afterwards. It invites you for a journey back to xeroxed zines, where a distinctive designer font and the joy of a black and white photocopy is more important than clinging on to lamentably regular typesetting convention.

Basic info

Number of fonts in a family: 1 (Regular) Number of glyphs per font: 401 Release date: 2014

OpenType Features

Fractions (frac) Localized Forms (locI) Case Sensitive Forms (case) Slashed Zero (zero)
